

# ABGG

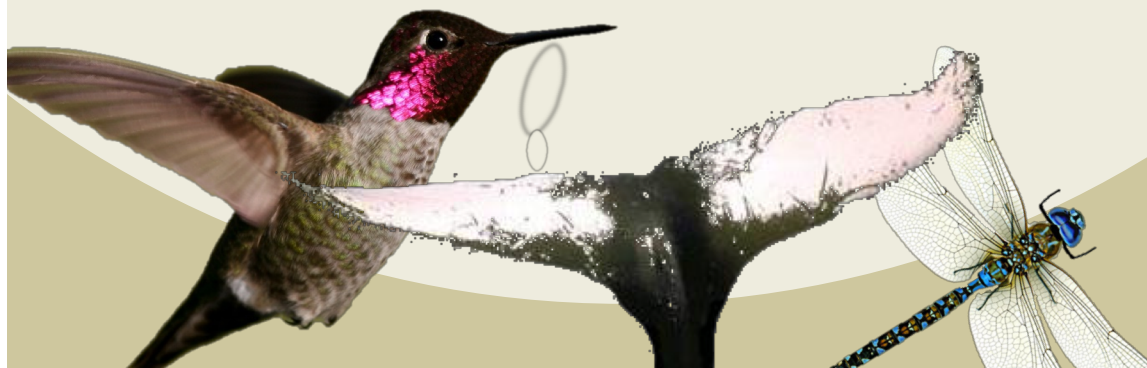

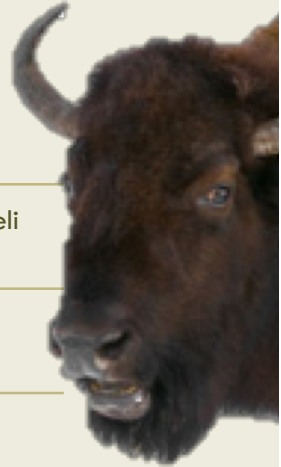

## Animal Behavior Graduate Group Winter 2019 Seminar Series

**Fridays @ 12:10 pm in 1150 Hart Hall**

Graduate students only: ANB290, CRN 21172

Undergrads: for course credit, contact Andy Sih ([asih@ucdavis.edu](mailto:asih@ucdavis.edu))

Jan 11	Can modeling the evolution of phenological cueing strategies explain variable responses to climate change?	Louie Yang UC Davis
Jan 18	Exploring the syndrome: Ecological and evolutionary implications of animal personality	Marcus Michelangeli UC Davis
Jan 25	The biomechanics of obstacle negotiation by hummingbirds and bees	Marc Badger UC Davis
Feb 1	Dog diversity as a natural experiment in cognitive and behavioral evolution	Evan MacLean U. Arizona
Feb 8	Application of behavioral research to improve conservation breeding and translocation outcomes	Ron Swaisgood San Diego Zoo
Feb 15	Evolutionary origins and ecological consequences of behavioral plasticity in dragonflies	Denon Start U. Toronto
Feb 22	Tackling animal welfare questions with phylogenetic comparative methods	Georgia Mason U. Guelph
Mar 1	Social networks as a tool for understanding infection risk and disease transmission	Brianne Beisner UC Davis
Mar 8	Predator-prey games in the high Andes: Resource limitation drives a puma-vicuña response race	Justine Smith UC Berkeley
Mar 15	The evolutionary origins of family living in lizards	Geoff While U. Tasmania

Note: Animals not to scale
